

Santiago D. Rodríguez M.

Frontend Developer

Spain, 03206 | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | santiagodrm@gmail.com | +34 633 874780

Frontend Developer and IT Systems Engineer specializing in React and TypeScript, with +3 years of experience building responsive, role-based web applications and APIs integrations. Skilled in component-based architecture, state management, authentication and automated testing.

Education

I.U.P “Santiago Mariño”

IT Systems Engineer

Work History

Autoparts Rausseo

[Website](#)

Frontend Developer

Remote

- Built a responsive automotive-parts catalog with React 19, TypeScript, TanStack Start, and Prisma, combining search, filtering, sorting and pagination to help customers discover products from inventory data.
- Implemented a two-step WhatsApp inquiry flow with React state synchronization, local persistence, and server revalidation, ensuring customers send accurate single/multi-product requests without stale catalog data.
- Established automated unit, end-to-end and responsive testing with Vitest and Playwright, validating 25 acceptance scenarios and protecting critical catalog and inquiry journeys across desktop and mobile.

HighMeds Pharmacy

[Live Demo](#)

Frontend Developer

Remote

- Developed a role-aware pharmacy management SPA using React, TypeScript, React Router, and Axios, helping users manage inventory and administrative operations through a centralized interface.
- Created a maintainable frontend architecture with TanStack Query, Zustand, React Hook Form and Zod, separating application concerns to make the system easier to maintain and expand.
- Built 5 Playwright end-to-end tests for authentication and 4 key administrative workflows, helping ensure critical inventory and user-management processes worked reliably.

Projects

Artisanal Food Marketplace

[Live Demo](#)

Fullstack Developer

- Developed a React and TypeScript marketplace with 22 API-connected screens, enabling customers, producers, and administrators to manage their core workflows efficiently.
- Implemented secure, role-based access with React Router, Auth0, and backend-controlled permissions, ensuring customers, producers, and administrators could access the tools relevant to their responsibilities.
- Turned visual designs into reusable React components and responsive Tailwind CSS layouts, creating a consistent experience across customer, producer, and administrator views.

Skills

Languages: TypeScript, JavaScript, HTML5, CSS3, SQL

Frontend Development: React, Next.js, React Router, TanStack Query, TanStack Router, Redux Toolkit, Zustand, Tailwind CSS, React Hook Form, Zod, Vite, TanStack Start

Integration & Testing: Vitest, Playwright, React Testing Library, REST API, Axios, Stripe, Better Auth

Backend & Data: Node.js, Express.js, Prisma ORM, PostgreSQL, JWT Authentication, OAuth

Tools & Delivery: Git, GitHub, Docker, GitHub Actions (CI), Figma, AWS (S3, EC2, SES), Postman

AI-Assisted Development: Agentic development workflows (Claude Code, Codex, Gemini), AI coding orchestration, specification-driven development, automated code analysis

Methodologies: Agile, Scrum, Soft Systems Methodology, requirements analysis, iterative development
